CoaLogix Selected by AlwaysOn as a GoingGreen Top 100 Winner
Recognized for game-changing technology and market value

Charlotte, NC, September 3, 2009 - CoaLogix Inc., a leader in regeneration of catalyst and environmental manager of coal-fired power plants, today announced that it has been chosen by AlwaysOn as one of the GoingGreen Top 100 Winners. Inclusion in the GoingGreen 100 signifies major developments in the creation of new business opportunities in the green technology industries. CoaLogix was specially selected by the AlwaysOn editorial team and industry experts spanning the globe based on a set of five criteria: innovation, market potential, commercialization, stakeholder value, and media buzz.

CoaLogix and the GoingGreen Top 100 Companies will be honored at GoingGreen West on September 14th - 16th, 2009 at Cavallo Point in Sausalito, CA. This two-and-a-half-day executive event features CEO presentations and high-level debates on the most promising emerging green technologies and new entrepreneurial opportunities.

“The GoingGreen Top 100 winners have excelled in key strategic areas in the global clean energy technology markets,” said Tony Perkins, founder and CEO of AlwaysOn. “We congratulate them for their success in introducing new tools, services, and systems that are driving the next phase of greentech innovation and transforming the biggest industries on earth.”

The GoingGreen 100 winners were selected from among hundreds of other technology companies nominated by investors, bankers, journalists and industry insiders. The

AlwaysOn editorial team conducted a rigorous three-month selection process to finalize the 2009 list.

Over 50 % of the electric generation in the US and 40% in the world comes from coal-fired power plants. As the United State and other countries look to new technologies for power generation, including coal, the environmental footprint of the existing fleet of power plants must be addressed in a holistic manner. CoaLogix is endeavoring to accomplish this with new technologies including catalyst regeneration, which not only reduces greenhouse gases from power plants, but also reuses catalyst, obviating the need for landfill of the massive amounts of environmentally unfriendly waste caused by spent catalyst. CoaLogix can regenerate catalyst at a fraction of the cost of new catalyst.

A full list of all the GoingGreen Top 100 Winners can be found on the AlwaysOn Web site at <http://alwayson.goingon.com/permalink/post/33354>

Bill McMahon, CEO of CoaLogix said “We are particularly honored by this award because of the long history of the GoingGreen organization, and being part of the august group of companies selected this year and in years past. On behalf of our employees, investors and especially customers, we proudly accept this award as a validation of the hard work, vision and value creation of our products and services. We will continue to reduce the environmental footprint of power generation including NO_x, CO₂ and other pollutants.”

About CoaLogix

CoaLogix is focused on providing cutting edge services to coal-fired generating facilities to reduce their environmental footprint through technology, optimization and efficiency improvements. CoaLogix owns SCR-Tech, LLC which is the leading provider of selective catalytic reduction (SCR) management services and catalyst regeneration technologies used by coal-fired power plants to reduce nitrogen oxides (NO_x) emissions. Currently, coal-fired power plants in just the US contain approximately \$2 billion of catalyst in their SCR systems. CoaLogix integrates leading-edge technologies, a highly-skilled workforce, and more than 160 years of combined senior management experience in the environmental and

power generation industries to provide innovative, cost-effective solutions that help our customers achieve and maintain compliance with increasingly stringent environmental regulations. CoaLogix's major investors are Acorn Energy, Inc. (NASDAQ: ACFN) and EnerTech Capital.

About Acorn Energy

Acorn Energy, Inc. (Nasdaq: [ACFN](http://www.acornenergy.com)) is a publicly traded holding company with equity interests in CoaLogix, Coreworx, DSIT and Gridsense. These companies leverage advanced technologies to transform and upgrade the energy infrastructure around the world. Acorn companies are focused on three problems in the energy sector: improving the efficiency of the energy grid, reducing the risk for owners of large energy assets, and reducing the environmental impact of the energy sector. Acorn's strategy is to take primarily controlling positions in companies led by great entrepreneurs. For more information visit <http://www.acornenergy.com>.

About AlwaysOn

AlwaysOn ignited the open-media revolution in early 2003 by being the first media brand to launch a global blog network. In 2004, AlwaysOn continued to lead the media industry in innovation by introducing a social network where members can connect and engage. AlwaysOn is also revolutionizing the media business by applying its open-media principles to its executive event series (Summit at Stanford, OnMedia, OnHollywood, OnDC, GoingGreen East and West, Venture Summit East and West) and quarterly print "blogazine" by empowering its members to post and share their ideas and meet each other online. As our loyal readers know, AlwaysOn is committed to the free-market, merit-driven approach to reporting and event programming. No other media brand has dared to create such open interaction with its readers and event participants.
