

CoaLogix Awarded New SCR Management Contracts for \$4,500,000

First time customers take advantage of SCR Management and Regeneration

Charlotte, North Carolina, November 13, 2009 – CoaLogix Inc. announced today that its subsidiary, SCR-Tech LLC, has received two new contracts for selective catalyst reduction (SCR) regeneration and catalyst management services worth approximately \$4.5 million. CoaLogix, a worldwide leader in SCR environmental services for electric utilities, received these new contracts from separate coal-fired generation companies. The electric generation companies cover several geographical regions including the Northeast and the Midwest. The regenerated catalyst will significantly reduce NOx emissions making coal cleaner. SCR-Tech will begin delivery of the regenerated SCR catalyst in the spring of 2010. In addition to regenerated catalyst, SCR management and catalyst testing services are included in the scope of supply.

CoaLogix has proven that regenerated catalyst costs less than new, can be available faster than purchasing new SCR catalyst, significantly reduces landfills and has a much lower CO2 footprint than new catalyst. To date, CoaLogix has regenerated over 18,000 modules of catalyst, many during actual plant outages. In addition, CoaLogix has over 20,000 MW under contract for catalyst management services. CoaLogix' NOxAssure program currently consists of over 2,500 modules of plate, honeycomb and corrugated catalyst of various specifications, representing over \$20,000,000 of "new value" to coal-fired power plants.

According to Bill McMahon, CEO of CoaLogix, "We are proud to add these new customers to the over 20,000 MW of SCR's under management. We continually strive to exceed expectations for our customers and these new orders are a result of that commitment. These new orders will likely be processed at our additional new plant recently announced here in Charlotte."

About CoaLogix

CoaLogix Inc. is focused on providing innovative services to coal-fired generating facilities to reduce their environmental footprint through technology, optimization and efficiency improvements. CoaLogix owns SCR-Tech, LLC which is a leading provider of selective catalytic reduction (SCR) management services and catalyst regeneration technologies used by coal-fired power plants to reduce nitrogen oxides (NOx) emissions. Currently, coal-fired power plants contain approximately \$1 billion of catalyst in their SCR systems. CoaLogix integrates leading-edge technologies, a highly skilled workforce, and more than 160 years of combined senior management experience in the environmental and power generation industries to provide innovative, cost-effective solutions that help our customers achieve and maintain compliance with increasingly stringent environmental regulations. CoaLogix is owned by Acorn Energy, Inc. and EnerTech Capital.

About Acorn Energy

Acorn Energy, Inc. (Nasdaq: ACFN) is a publicly-traded holding company with equity interests in CoaLogix, Coreworx, DSIT and Gridsense. These companies leverage advanced technologies to transform and upgrade the energy infrastructure around the world. Acorn companies are focused on three problems in the energy sector: improving the efficiency of the energy grid, reducing the risk for owners of large energy assets, and reducing the environmental impact of the energy sector. Acorn's strategy is to take primarily controlling positions in companies led by great entrepreneurs. For more information visit <http://www.acornenergy.com>.

About EnerTech Capital

EnerTech Capital is a pioneer in the CleanTech space and has been successfully investing in energy and clean energy technology companies since 1996. The Firm brings a practical, proven and seasoned approach to its investment activities while focusing on early to expansion stage opportunities that dramatically improve the profitability of producing, transporting/transmitting or consuming fuels/power. EnerTech is located in Philadelphia and Toronto. For more information visit www.enertechcapital.com.

Safe Harbor Statement

This press release includes forward-looking statements, which are subject to risks and uncertainties. These risks and uncertainties include competition in the market for catalyst and regeneration and possible adverse changes in governmental regulations affecting utilities' need for catalyst. For disclosure of additional risks and uncertainties which may affect CoaLogix's business and prospects and Acorn Energy, Inc.'s business generally, see the information under "Risk Factors" in Acorn Energy's most recent Quarterly Report on Form 10-Q and Annual Report on Form 10-K as filed with the Securities and Exchange Commission.
