

Acorn Energy “*The Digital Energy Company*” Will Attend the Las Vegas Money Show & Present at the 6th Annual Barrington Research Industrial & Business Services Conference

Montchanin, DE (May 14, 2012) - Acorn Energy, Inc. (NASDAQ: ACFN) today announced that John A. Moore, Chairman of the Board and CEO of Acorn Energy will present at the Barrington Research Industrial & Business Services Conference on Tuesday, May 15 in Chicago, IL.

The Barrington conference features a full day of intimate one on one and small group meetings between company management teams and investors. Acorn will be attending this conference for the first time. “The small group setting is an excellent format for Acorn to present our framework and philosophy on digital energy and our portfolio companies’ place in that framework”, said John Moore, CEO of Acorn Energy.

Acorn Energy will also attend and John A. Moore, Chairman will speak at the Las Vegas Money Show, Las Vegas, NV., May 14-17. Please visit us at Booth 610 during the show.

Moore will be speaking on May 16 at 3:15 PM. His presentation “The Surprising Transformation of Our Energy Structure, Which Will Drive the Next Era of Prosperity” will be interesting to investors of all types. Mr. Moore, co-author of *The Hidden Cleantech Revolution*, will offer his insight into Digital Energy and comment on notable contrasts with both wind and solar energy.

Money Show attendees can see John live in Forum Room 12 at 3:15 PM on May 16th or you can hear this presentation by Webcast live or by replay at:

About Acorn Energy, Inc.

Acorn Energy, Inc. is a holding company focused on making energy better by providing digital solutions for energy infrastructure asset management. The four businesses in which we have controlling interests, improve the world's energy infrastructure by making it: more secure - providing security solutions for underwater energy infrastructure (DSIT); more reliable - providing condition-based monitoring to critical assets on the electric grid (GridSense, OmniMetrix) and more productive and efficient - increasing oil and gas production while lowering costs through use of permanent ultra-high sensitive seismic tools that allow for a more precise picture of reservoirs (US Seismic).
